

Archaeological field workshop:

Prehistory and underwater archaeology in Russia. Methods, history and perspectives of underwater archaeology

(in the framework of SCOPES Institutional Partnership Network in Eastern European Neolithic and Wetland Archaeology for the improvement of field techniques and dating method)

The workshop is organized and carried out by:

- The State Hermitage Museum, Russia
- University of Bern, Switzerland
- Taras Shevchenko National University of Kyiv, Ukraine
- Euro Balkan University, Center for Prehistoric Research, Macedonia

Venue: Smolensky and Pskovsky region (Russia)

Terms: from 9 August to 16 August 2015.

Description: The field week will take place in archaeological microregions near the Serteya River and the Sennitsa and Usviaty lakes. Participants will gain insight into the paleogeography and archaeology of the area. The programme includes lectures and diving on the Serteya II site, with the aim of discussing in depth methods of underwater excavation, dating and conservation. More detailed information about the archaeology of this region can be found at <https://hermitage.academia.edu/AndreyMazurkevich/Papers?s=analytics#add>
